

# THE LAWNOLOGIST

GRASS CARE SPECIALIST

“In just 5 weeks Mark has transformed our lawn”

# Premium Lawn Care to create a luscious, prestige lawn for your outside space

*Our Bespoke services offer you a 4-step plan for a thick, lush and healthy lawn that is weed and moss free.*

If you're the owner of a large lawn that is generally looking tired, patchy, and unhealthy then you're not alone. You likely have a few issues with your lawn that are the result of not being able to devote enough time to it. While a gardener can help tidy up the garden, most don't have the skills or equipment necessary to keep your grass healthy and full.

Every lawn is unique, and each lawn can suffer from different problems. An overgrowth of moss and weeds or common diseases that cause patchy areas of dead grass. Your lawn could also be victim to native pests that feed off the lawn as well as heavy thatch that starves your lawn of the nutrients it needs.

It is necessary to address each problem with specialized treatments in order to achieve the lawn that you desire. A beautiful lawn doesn't happen by itself; taking care of it requires time, knowledge, and patience. By trusting The Lawnologist you can relax and enjoy an exceptional lawn saving you time, money, and hassle.

At the Lawnologist we believe a lawn is the centrepiece of your garden.

We care for your lawn using gentle ecological techniques backed by science. This ensures your soil, blade and seed have the perfect environment to flourish.

We pride ourselves on using organic fertilisers and only using synthetic fertilisers where absolutely necessary. Organic fertilisers provide greater longevity to your lawn, resulting in less treatment to ensure it stays healthy and lush.

*"the grass has never looked so luscious and green"*

Whilst organic fertilisers may take a little longer to show results, the benefits to your lawn are worth the wait. Organic fertilisers not only improve the look of your lawn but also condition the soil. Conditioned soil is essential to creating a healthy and sustainable foundation. This will promote growth year after year.

By hiring The Lawnologist we can begin our 4-step process and create a bespoke service that fits your lawn's needs.

# The 4 step methodology

The Lawnologist offers 3 bespoke programs that will rejuvenate your lawn and create a healthy blade that is full of life. Each one is tailored to your lawn's specific needs after a consultation with a Lawn Expert.

1

Once you book your consultation – We will come and inspect your lawn, looking at the soil health and grass condition. We also identify your lawn's main issues.

2

We can now design your bespoke Lawnologist care plan and share with you how we will achieve the result you want .

3

We will begin the season-specific treatment plan that will begin bringing life back to your lawn.

4

Sit back and enjoy your healthy, luscious weed free lawn.

## About us

The Lawnologist is owned by its founders Mark and Lauren Walsh. Mark spent many years in front-line Policing before turning his passion for transforming lawns and gardens into a thriving business. The Lawnologist is committed to creating amazing lawns with environmentally friendly sustainable methods at the very heart of the business.

Family and friendships are extremely important to Mark and Lauren. They pride themselves on building amazing customer relationships and delivering outstanding customer service. Mark's commitment is shown by his dedication to being mentored by the President of the UK Lawn Care Association and becoming a proud active member.

With the environment at the heart of what we do, we exclude the use of synthetic fertilizers and chemicals as much as possible. We focus on organic feeds, organic top dressings and tried and tested cultivation methods backed by research. These enhance the soil structure and grass naturally which is safe for the environment, humans, and pets after application.

The Lawnologist provides bespoke and specialist lawn care in North Essex and South Suffolk including Colchester, Sudbury, Halstead, and surrounding villages.

Mark is the very epitome of professionalism. A quick visit identified a range of problems with our lawn which was quickly followed up with a detailed quote and action plan. In just five weeks, Mark has transformed our lawn, which was made up of moss, weeds and very little grass, into a thing of beauty, It was a herculean task, evidenced by the five builders bags of moss and weeds, all completed in time to get some seed into the ground ahead of the first frosts.

Great Horkesley*

Mark came round and explained his thoughts and what his plan was. He was very knowledgeable, and I learned more about lawns in an hour with mark than I knew in 20 years.

Mark stripped our lawn back, top-soiled it and reseeded it along with an organic dressing. He left instructions which we duly followed and within a week it was coming back to life. Another week and it was looking seriously green and now three weeks since mark visited it's unrecognisable.

*Terry Knight  
Wivenhoe*

Mark's expert knowledge, professionalism and excellent communication immediately made me feel that my garden was in safe hands. Mark did exactly what we'd discussed and suggested sensible additions to the plan. Highly recommended.

*Juiet Townsend  
Earls Colne*

I have had the lawnologist over for a complete lawn renovation after suffering badly from the summer drought and years of poor care through having its feed of too much nitrogen from another lawn care company.

They have done a wonderful job, so professional, have great results, are incredibly thoughtful and are always willing to go the extra mile! I would recommend the lawnologist.

*Toni Harridge  
Highwoods*

We have used grass maintenance companies for many years but none of them come close to the passion, care, value and results of Mark at Lawnologist. We opted for the year pre-payment program with the added driveway weed control.

The value for money is amazing, and more importantly, the grass has never looked so lustrous and green, no more weeds or bare patches and the unevenness of a new build garden has disappeared. The driveway weed control is a must, killed all weeds within 2 weeks and have not seen a weed since the application in June. Looking forward to many more years of Mark maintaining the grass.
